Provisional Auroral Electrojet Indices (AE11)  
for January - December 1994

## 1. Introduction

This report, prepared as part of the contribution of the WDC-C2 for Geomagnetism, Kyoto to the STEP program, gives provisional Auroral Electrojet Indices for the year 1994. For the details on the AE indices, reference is made to Data Books Nos. 3-23 published from the WDC-C2 for Geomagnetism, UAG reports published from WDC-A for Solar-Terrestrial Physics, and the paper by T. Davis and M. Sugiura (1966). The production of the AE indices is an activity of the WDC-C2 for Geomagnetism, Kyoto as a contributing member of the International Service of Geomagnetic Indices.

To facilitate a rapid publication of provisional AE indices, less rigorous screening was applied to the data used than is normally done for the derivation of the AE indices. The version of provisional AE indices reported here, which we call the provisional AE(11), does not include the data from Tixie for all the periods for which we did not receive data in time. The final AE indices will be calculated and published in the Data Book series at later dates.

## 2. Data Used

The data from the eleven observatories listed in Table 1 are used. Digital values recorded by digital magnetometers were supplied directly to us by LRV, NAQ and ABK and via INTERMAGNET from CMO, BRW, YKC, FCC and PBQ. CCS, CWE and DIK data were digitized by AARI and supplied to us as a cooperative project of WDC-C2 Kyoto, WDC-A for STP, WDC panel and AARI.

## 3. Results

The monthly quiet-time H reference values are listed in Table 2. Table 3 gives the hourly average values of the provisional AE(11) indices (AU, AL, AE and AO).

Daily graphs of 1.0-min AE indices (AU, AL, AE and AO) are shown in Fig. 2, and corresponding plots of the contributing stations are given in Fig. 3. Supplemental plots for disturbed days are given at the end of Fig. 2. Figure 4 shows the H-traces of magnetograms from AE(11) stations from January to December 1994. A summary plot of of hourly values of AU and AL indices is given in Fig. 5.

## 4. Acknowledgements

The calculation of the provisional AE indices in this volume was made possible with the data provided directly to us by the AE stations or through the World

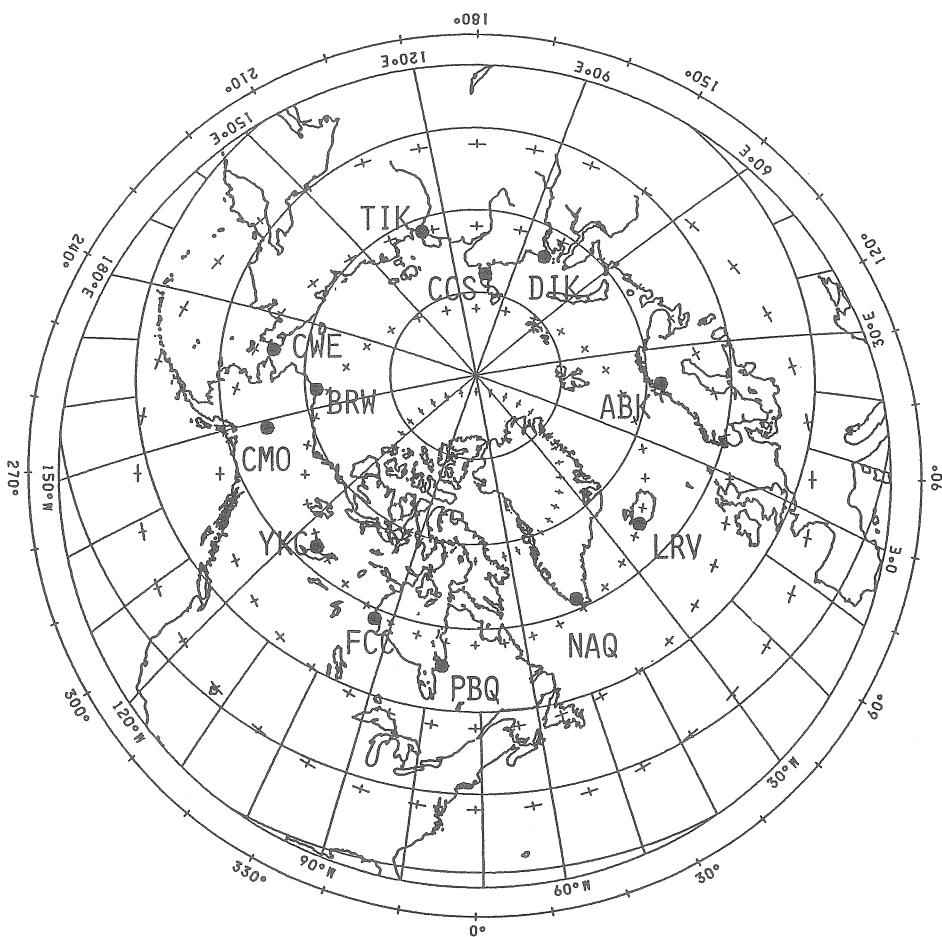

Figure 1. Distribution of AE(12) stations.

This figure is drawn by Lambert projection with the geomagnetic north pole at its center. Geographic coordinates are indicated by solid lines. Geomagnetic coordinates are shown by thin plus signs. Latitude circles are drawn at 10° intervals. Geomagnetic longitude is shown by the numbers along the outer circle and geographic longitude is given by the numbers along the inner circle with suffix E or W.
